

BRACE YOURSELF...

...for something new.

A mysterious, moon-size alien... filled with civilization-changing treasures... and we get to watch this discovery change human civilization!

This is a tale of the future, a future that is really possible.

This is technofiction – science fiction where science matters as much as characters!

A **Tales of Technofiction** Book

**Roger White** is a careful observer of life and people, and he's done so from many interesting perspectives. He was a soldier in Vietnam in the 60's, a college student at MIT in the 70's, a computer network pioneer in the 80's, and a teacher in Korea in the 90's.

Roger thinks about how technology affects how we live, and then writes about it.
