A **Tales of Technofiction** Book

Roger White is a careful observer of life and people, and he's done so from many interesting perspectives. He was a soldier in Vietnam in the 60's, a college student at MIT in the 70's, a computer network pioneer in the 80's, and a teacher in Korea in the 90's.

Roger thinks about how technology affects how we live, and then writes about it.
