

BRACE YOURSELF...

...for something new.

Two scientists summon an angel.

It's 2053, and only one person per year can visit our pristine national parks.

How do you abandon New York City without leaving a smoking ruin?

A **Tales of Technofiction** Book

Roger White is a careful observer of life and people, and he's done so from many interesting perspectives. He was a soldier in Vietnam in the 60's, a college student at MIT in the 70's, a computer network pioneer in the 80's, and a teacher in Korea in the 90's.

Roger thinks about how technology affects how we live, and then writes about it.
